

AI1110 Assignment 1

MALOTHU AVINASH AI21BTECH11018

March 2022

Q5(B): Rekha opened a recurring deposit account for 20 months. The rate of interest is 9% per annum and Rekha receives ₹441 as interest at the time of maturity. Find the amount Rekha deposited each month.

Solution: According to given question

Rekha opened a recurring deposit account for 20 months(n),

Rate of interest(r) is 9% per annum, and Rekha receives ₹441 as interest at the time of maturity.

From simple interest formula $I = p \cdot t \cdot \frac{r}{100}$
 $\Rightarrow TotalInterest(i) = x \cdot \frac{1}{12} \cdot \frac{9}{100} + x \cdot \frac{2}{12} \cdot \frac{9}{100} + x \cdot \frac{3}{12} \cdot \frac{9}{100} + \dots + x \cdot \frac{20}{12} \cdot \frac{9}{100}$

Given Total Interest is 441 then

$\Rightarrow 441 = x \cdot \frac{9}{1200} (1 + 2 + 3 + \dots + 20)$

$\Rightarrow x = \frac{441 \cdot 1200 \cdot 2}{9 \cdot 20 \cdot 21}$

Finally we get $x = 280$

c code output as follows
